

**To
The Principal**

Sub: JNTUH Innovation Hub (JHUB) - Establishment of JLABS in institutions- Reg.

Dear Principal/Director,

A University wide Research Development of Innovation Initiative JHUB has been launched to create the culture of Innovation across JNTUH colleges. JHUB is envisioned to expose the engineering graduates to Ideation, Experimentation and tech prototype building through a series of Intervention programs throughout the year. It is a unique platform of programs, facilities and networks and an ecosystem to support innovations and tech startup incubation.

JHUB works in a hub-and-spoke model with College end units called JLABS seeding the culture of Innovation and the Central Hub at University campus providing deeper enablement to convert innovative ideas to products and possibly tech start up incubation by the time they graduate. JLABS will have opportunity to participate in various innovation and start up initiatives and University grading of Institutions on innovation index.

The institutes registering with JHUB shall nominate a suitable SPoC (Single Point of Contact) to take part in the meetings and workshops at JHUB for conduct of events as per calendar and make best use of the opportunities provided from time to time. The University Startup policy for faculty and students will further provide guidelines for consideration of the activities for award of credits in their coursework.

The registration of your institution to connect to JHUB can be made at

<http://bit.do/Colleges-Registration-with-JHUB>

Registration of the institution is mandatory to extend the opportunities to the students of your institution for any further information you can reach out to jhub@jntuh.ac.in
